

CampusNetDAO Whitepaper

CampusNetDAO is a decentralized autonomous organization focused on empowering university students through Web3 education, on-campus innovation, and community-driven opportunities. Built on Solana, the DAO integrates learning, earning, and governance in a single ecosystem that transitions members from students to Web3 professionals.

Vision & Mission

To build the largest network of student-led DAOs across campuses — creating a sustainable pipeline from education to Web3 employment and entrepreneurship.

Governance Structure

CampusNetDAO operates under a three-tier governance system:

1. **Core Team:** Founding and technical members overseeing long-term strategy.
2. **Contributors:** Active student members executing proposals, bounties, and on-campus projects.
3. **Community Members:** Students and alumni participating in governance, learning programs, and ecosystem growth.

Tokenomics

The native token — **CAMP** — powers governance, incentives, and partnerships.

Total Supply: 100,000,000 CAMP tokens.

Allocation:

- 40% Community Rewards & Education Incentives
- 20% Treasury (for ecosystem and partnerships)
- 15% Core Team (vested 12–24 months)
- 15% DAO Operations & Grants
- 10% Strategic Partners & Investors

Membership & Transition Policy

Membership is open primarily to students, but alumni may remain active within the DAO for up to 12 months post-graduation, ensuring a smooth transition into Web3 careers or mentorship roles.

Partnership Framework

CampusNetDAO partners with blockchain protocols, education platforms, and industry leaders to expand student access to Web3 infrastructure and real-world applications.

Automation & Tools

To streamline DAO operations and engagement:

- **Token-Gated Access** via Guild.xyz or Collab.Land
- **Work-to-Earn System** using Dework or Wonderverse
- **Proposal Governance** automated through Snapshot or Discord-based polling

CampusNetDAO — Building the Future of Student-Led Web3 Innovation.
